DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohbayashi et al. (US 6,492,005 B1) in view of Tanuma (JP 2000-238421).
- 3. Ohbayashi discloses a recording sheet comprising a support and ink absorptive layer on the support (abstract). The ink absorptive layer comprises pseudoboehmite particles with a particle size of 0.01-0.1um (col. 13, lines 35-50), a polyvinyl alcohol with a saponification degree of 70-100% and a polymerization degree of at least 1000 (col. 14, line 11-18), a hardener such as boric acid or salt thereof (col. 15, lines 28-52), and antioxidant such as hindered amine (col. 17, line 32-41). The ink absorptive layer further comprises surface active agents (col. 16, line 26). Ohbayashi does not disclose a hindered amine having any of the claimed structural formula.
- 4. Tanuma discloses a recording sheet comprising a base material and an ink absorbing layer containing alumina hydrate provided on the base material (claims 1-4). The alumina hydrate is a boehmite structure of formula Al2O3.nH2O, wherein n is a number from 1.0 to 1.5 [0019]. The ink absorbing layer further comprises a binder such as polyvinyl alcohol [0023], and a hindered amine such as compound represented by Formula 2 [0033]. The amount of hindered amine is 0.01-10 wt% [0015]. With respect

to optical density average lost percentage value, it is elementary that the mere recitation of newly discovered function or property, inherently possessed by things in the prior art, does not cause a claim drawn to those things to distinguish over the prior art. *In re swinehart et al.*, 169 USPQ 226 at 229. Since the Tanuma reference teaches the claimed color fading inhibitor compound, it is inherent that the reference article function in the same manner claimed by Applicant. The burden is upon Applicant to prove that the subject matter shown to be in the prior art does not possess the characteristic relied on.

Page 3

5. Ohbayashi and Tanuma are analogous art because they are from the same field of endeavor that is the ink jet recording sheet art. At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the hindered amine of Tanuma with the invention of Ohbayashi in order to prevent fading after printing (abstract and [0005] of Tanuma).

Conclusion

- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 571-272-1529. The examiner can normally be reached on Mon.-Fri. 8:00AM-4:30PM.
- 7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1774

8. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
